To all the Saturday School parents,

Precautions towards H1N1 Flu

Thank you very much for your continued cooperation and support for Saturday School.

As you may already know, there have been a considerable number of people infected with the H1N1 flu all over Japan and the government has recognized that a pandemic of the H1N1 flu is underway now.

If your child or any of your family members are sick with a flu-like illness, we suggest you seek medical care before it gets worse and so that the virus can be detected at an earlier phase. If you are identified as having the H1N1 flu, please report it to the Special Programs Office immediately. If that's the case, we'd also like you to stay home at least two days after your fever is gone.

If a majority of the students are infected with the flu, please understand that there is a possibility we might have to ask you to stay home or cancel school in order to prevent the spread of the virus to others.

Our priority is to take the best precautions possible and we'll encourage all the kids and the staff to wash their hands and gargle. Please take these everyday precautions at home as well.
